Relevant Experience

Front End developer. Webloo Dec 2023 – Feb 2024 . React Js, JavaScript, CSS

- Developed a responsive landing page in React, incorporating design patterns and structured layouts. Employed tools like carousels and Swipers to enhance user experience. Demonstrated proficiency in front-end development while maintaining a keen eye for design aesthetics.

Mobile Shopee E-Commerce Website . UpWork Jan 2023   PHP, MySQL

- I established secure MySQL connections and defined database tables for 'M-shope' using PHP and SQL.
- Implemented AJAX for dynamic cart updates and utilized Owl Carousel for product displays.
- Developed PHP scripts for product listings and user-friendly cart interactions.
- Crafted detailed product pages with dynamic data retrieval for comprehensive product information.

Full Stack developer . FeenTech Feb 2022 – Jan 2023 . PHP, Laravel, HTML

- Developed and styled interactive web applications
- Tested and fixed code and implementation issues, to improve hospitality during the experience and better serve the client needs.
- Architected and implemented the user interface for the contact component using Boostraps and css.
- Contributed extensively to the creation of the main architecture using design patterns to the class diagram to make it flexible in future changement.

Selected Projects

Full-Stack Blog App . Next.js & React, JavaScript, Prisma, SWR, MongoDB, Firebase

- I developed a backend authentication system using NextAuth
- I created RESTful API endpoints using Next.js, Prisma, and MongoDB, allowing functionalities like retrieving categories, posts, comments, and user sessions.
- I built a responsive UI with authentication states, enabling users to access specific features like writing and logging out based on their authentication status .
- I developed a comment section where users can post and view comments in real-time using SWR , enhancing user engagement.

EverWell . React Js, JavaScript JQuery , CSS

- Took charge of implementing key features, ensuring functionality and user-friendliness.
- Collaborated closely with the design team, utilizing the Figma file provided by the designer to accurately implement the app's interface and user experience.

Movie App review React Js, Java, Spring Boot, MongoDb

- Crafted a React movie platform with UI integrations and React Router for navigation, allowing rich-text posts, media uploads, and video playback..
- Engineered RESTful APIs with Next.js, Prisma, and MongoDB for movie functionalities.
- Implemented Spring Boot systems managing movie data via controllers and services.

Skills

Programming Langugaes

JavaScript, TypeScript, HTML, Express, NodeJS, CSS, Sass, PHP

Libraries & Frameworks

React, Next.js, Gatsby, React Native, Tailwind, bootstrap

Tools & Platforms

Git, GitHub, Netlify, Vercel, Heroku, WordPress, Docker, Firebase, Figma, Drupal WooCommerce, Mangento, Shopify

Portfolio Next.js & React Typescript

Engineered server-side email functionalities with strict validation, enhanced UI flexibility with React, and developed customizable themes.

Education

Al Akhawayn university - 2023
Master Software Engineer

American University of Leadership
Bachelor in computer engineering minor in big data   - 2021

Certification

freecodecamp

Responsive Web Design
JavaScript Algorithms and Data Structures

Languages

English: Fluent
French: Bilingual
Arabic: Mother tongue
Mandarin: Limited proficiency

Interests

Video editing, Bodybuilding, chess, , Cinematography, content creation and football
